Coronavirus Concerns Update **Tuesday March 24, 2020**

Our Adult Day Care Centers are Open

Our staff has implemented telephone check-ins with our clients. If you need us and wish to have us reach out, please call 702-648-3425.

Each day the news carries stories about the Coronavirus and it is only normal that our family caregivers have concerns. The health and well-being of both your loved one and our staff is uppermost at Nevada Senior Services at all times.

As of this moment, there are no reported cases associated with Nevada Senior Services clients, staff or associates.

The Southern Nevada Health District reported 212 cases of Coronavirus in Clark County

What Is Nevada Senior Services Doing to Protect Your Loved One?

- ✓ We have doubled our cleaning efforts including facility disinfecting both during the day at night.
- ✓ We have provided additional staff training including precautions.
- ✓ We have increased prevention measures including our emphasis on staff hand washing and use of gloves.
- ✓ We have increased monitoring of clients' health looking for any possible symptoms.
- ✓ We are in close touch for updates with the Southern Nevada Health District.

What do Older Adults & Persons with Disabilities Need to Know?

The CDC (Centers for Disease Control) recommends:

- Avoiding close contact with people who are sick.
- Avoiding touching your eyes, nose, and mouth.
- Staying home when you are sick.
- Covering your cough or sneeze with a tissue, then throwing the tissue in the trash.
- Cleaning and disinfecting frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- Following CDC's recommendations for using a facemask.
 - CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory diseases, including COVID-19.
 - Facemasks should be used by people who show symptoms of COVID-19 to help prevent the spread of the disease to others.
- Washing your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
 - If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.

If you believe your loved one has had an exposure to someone with Coronavirus or if you have any concerns about your loved one's health, please check-in with our nurses or ask Dee Dee (702.333.1518) to have one of our nursing team schedule a telephone call with you.

Our clients are our most important concern.

We will provide you with updates should additional information become available.
